

ScienceDirect

Lithuanian Road Show

25-27 March 2013

Igor Hundziak,
Country Manager Poland, Ukraine & Baltics
AGC Emergia; Elsevier B.V.
i.hundziak@elsevier.com

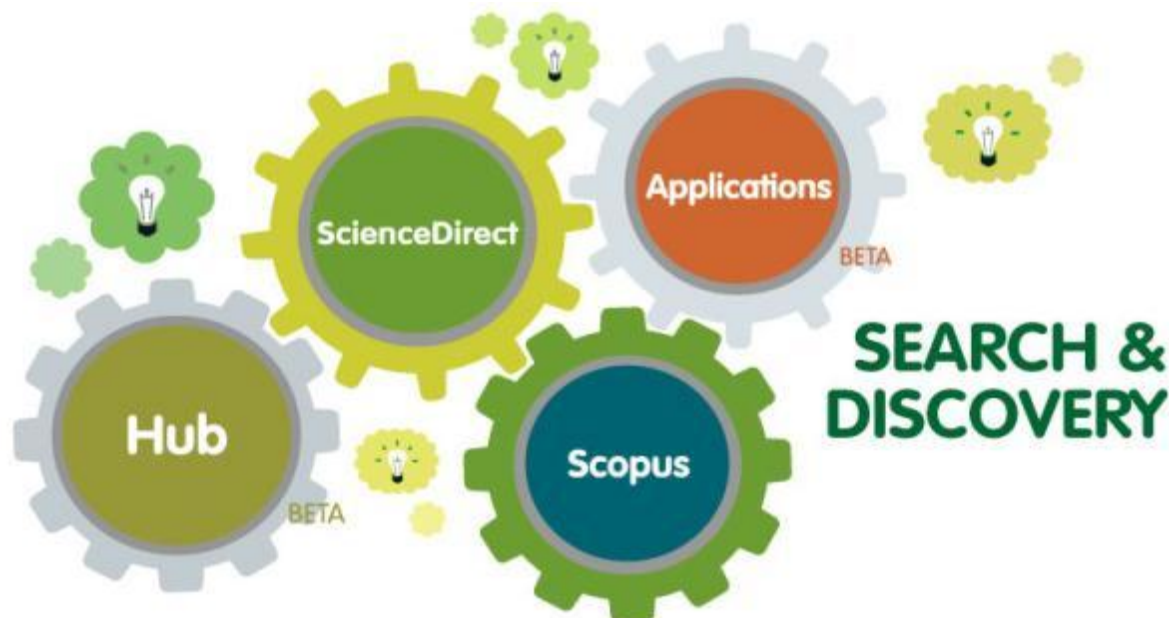

Agenda

- **Introducing the SciVerse Platform**
- **SciVerse ScienceDirect Updates**
- **SciVerse Hub**
- **SciVerse Applications**
- **Admin Tool**
- **Q&A**

What is SciVerse?

SciVerse empowers the research community to accelerate science by opening ScienceDirect & Scopus content APIs for third-party application development, enabling intelligent search and discovery across integrated content from ScienceDirect, Scopus, and the scientific web

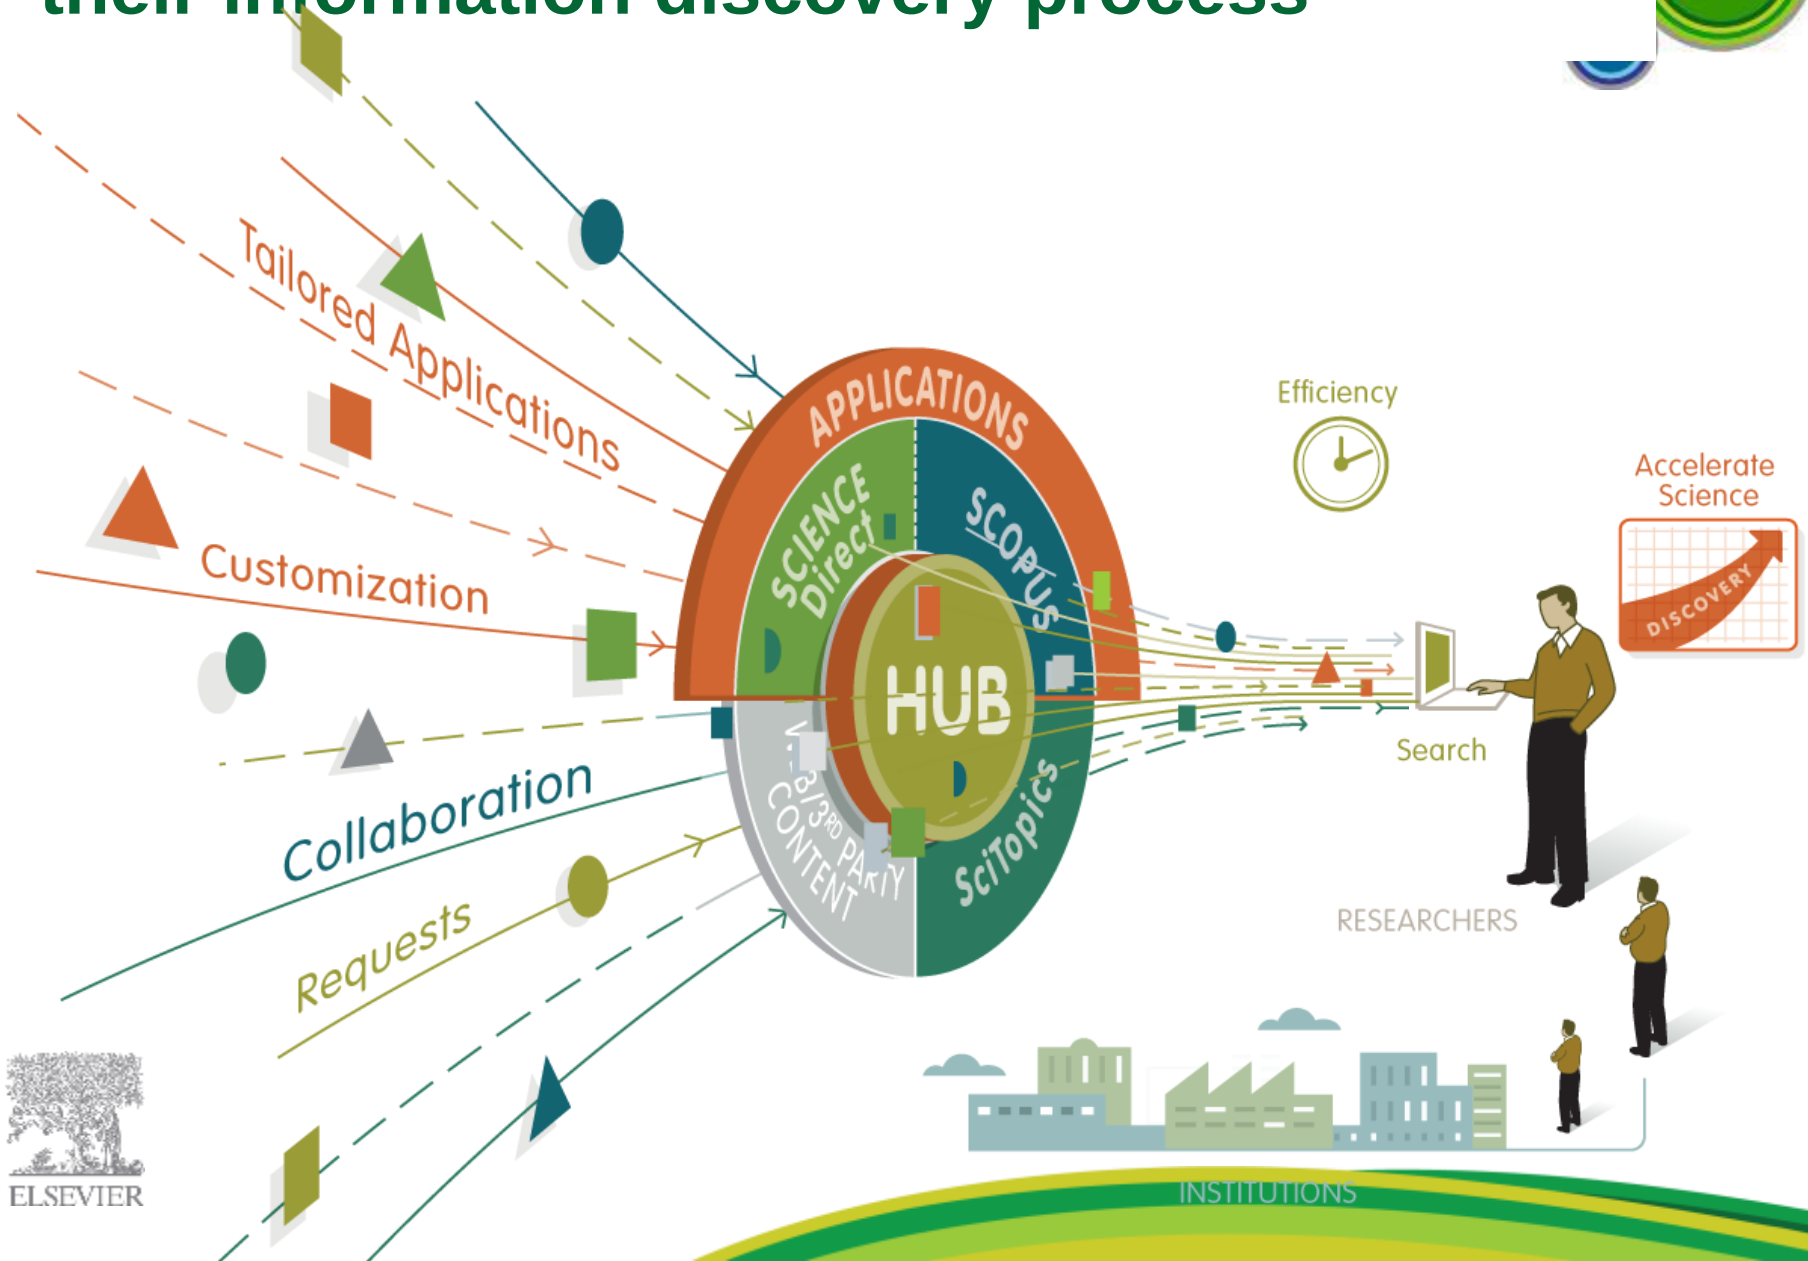

The problem isn't just having too much information...

...It's about accessing the right information in an efficient and effective way

Researchers can save time and improve their information discovery process

SciVerse

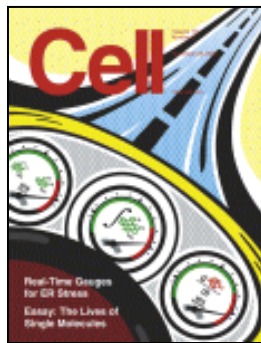

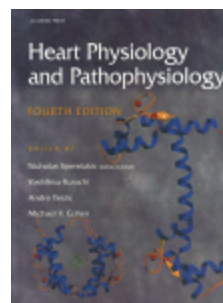

ScienceDirect

- ScienceDirect is Elsevier's extensive and unique full text database that covers authoritative titles from the core scientific literature.

- More than nine million full-text articles from 2,500 journals and 11,000 books are available in ScienceDirect, making up 25% of the world's STM literature.

The New
SciVerse ScienceDirect

ScienceDirect has steadily growing content

ScienceDirect available content

Based on analysis by Leo de Vos, Head of Pricing

Investments on ScienceDirect

Supporting librarians, info specialists and administrators

2010	2011	Forthcoming
• Launch of Health Science Dentistry book collection • Pick and choose model for pre-1995 books content	• Launch of EMC Spanish and Italian collections providing high quality medical content in local language together with the broader context of international research • Launch of Elsevier Urban & Fischer Archives offering three journal back file collections: Immunology and Microbiology, Medicine and Biochemistry • Expansion of Evidence Based Selection model to front list for books • Agreements reached with discovery services to expand discoverability of ScienceDirect's full text through e.g. EBSCO and Ex Libris • First steps in improving Pay-per-View purchase process and a more efficient process to order MARC21 records for book customers • Completely overhauled content infrastructure • Ability for users to manage remote access themselves ensuring content is available anytime, anywhere • More uptime and improved reliability by decreasing number of product outages – and outage duration - needed to allow for launching new enhancements	• Admin Tool enhancements providing administrators with enhanced tools to manage institutional settings on ScienceDirect and/or Scopus • Automated process for ordering Marc21 records

Investments on SciVerse ScienceDirect

Increasing research efficiency

2010	2011	Forthcoming
• Dedicated Image Search to immediately delve into e.g., tables, photos, figures, graphs, and videos across all post 1994 content • A range of free applications to select from to increase workflow efficiency e.g. eReader Formats, Table Downloads • Single log-in and increased interoperability with licensed and free SciVerse products e.g., find author and citation information from Scopus immediately within the ScienceDirect article • Mobile Applications available for iPhone, Android, Blackberry and iPad to access Elsevier journal articles and chapters from books series while on the road	• PDF Download Manager, allowing users to select and automatically download, re-name and save multiple documents simultaneously, made available for all most-used browsers • Article and general page loading speed improvements • Google search terms highlighted within the ScienceDirect article to ensure users can quickly evaluate why the article is relevant to them • Reference Work Helper offering relevant information from reference works and encyclopedia from within the selected article on ScienceDirect • Related entitled articles are offered when finished reading a PDF article to ensure not to miss out on other matching literature from ScienceDirect • Improved page loading speed for the search results page to enable faster access to the article information • A continuously growing list of contextualizing resources, providing context around the article, e.g., – REFLECT offering contextual information on proteins, genes and small molecules within the article – Integration of PANGAEA to find corresponding data in earth system research embedded in ScienceDirect article for earth and environmental scientists – Integration of REAXYS improving discoverability and visualization of chemical structures – Interactive maps from GoogleMaps integrated in the article	• A redesigned article page providing instantaneous access to contextualizing in- and external resources and new navigation tools

ScienceDirect online advantages

The screenshot displays the ScienceDirect website interface. At the top, there are navigation links for Hub, ScienceDirect, Scopus, and Applications. A search bar is prominently featured with the text 'heart attack' entered. Below the search bar, the results show '124,497 articles found for: ALL(heart attack)'. The interface includes various filters on the left side, such as 'Search within results' and 'Refine results' with options for 'Content Type' (Journal, Book, Reference Work) and 'Journal/Book Title'. The main content area lists three articles, each with a title, journal information, and authors. The first article is 'Patients' perceptions of their heart attack and recovery: the influence of epidemiological "evidence" and personal experience' by Rose Willes. The second article is 'Mortality in the beta blocker heart attack trial: Circumstances surrounding death' by Robert W. Peters et al. The third article is 'Pre-Hospital 12-Lead Electrocardiography Programs: A Call for Implementation by Emergency Medical Services Systems Providing Advanced Life Support—National Heart Attack Alert Program (NHAAP) Coordinating Committee; National Heart, Lung, and Blood Institute (NHLBI); National Institutes of Health' by J. Lee Garvey et al. Each article entry includes a 'Show preview' link and a 'PDF' download link.

Community

Publisher & Platform Advantage: From Quality Content to Customer Experience

Interoperability

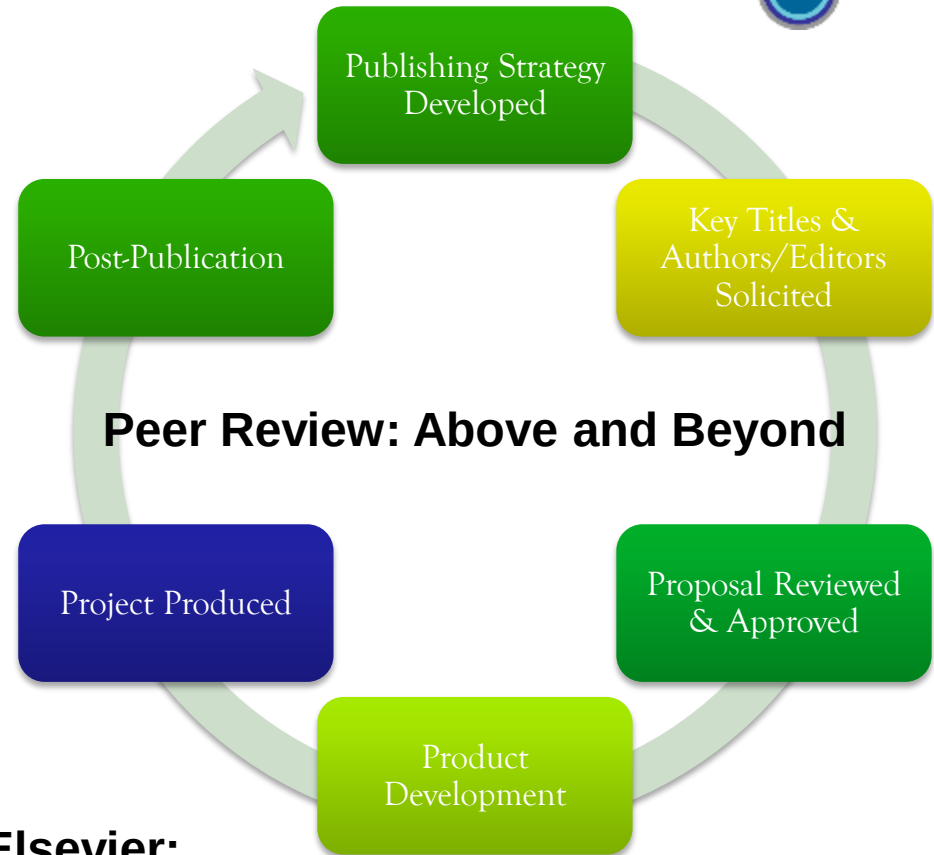

Mobility

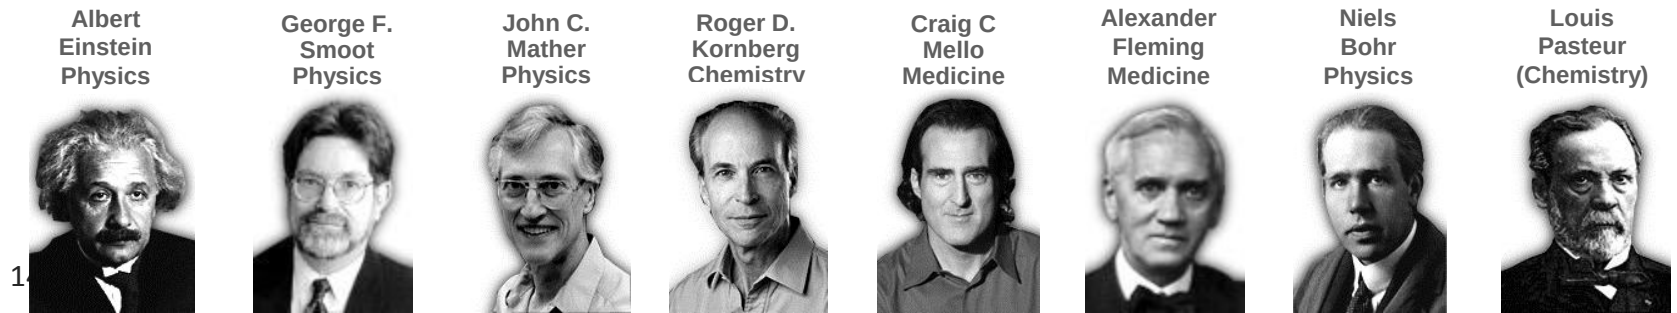

The Publisher and Platform Advantage

- Number of reviewers: **Thousands of expert, international reviewers** for each and every book proposal, chapter, and book manuscript submitted several times
- Corrections/Revisions: **Millions of corrections** by copy editors each yr.
- Rejection rate: Spontaneous proposal submissions undergo very close scrutiny, and **rejection rates are 80-95%**.
- Our book proposals come from targeted, strategic acquisition, with our acquisitions editors specifically deciding on important books to publish, **by the best authors**

Nobel Prize winners published with Elsevier:

Looking back .

..

Looking ahead: The Platform Advantage

- ✓ Simultaneous, unlimited user access
- ✓ No DRM
- ✓ Search across books & journals
- ✓ 24/7 availability
- ✓ **And now, more...**

Platform advantage: Integrated search

The screenshot shows the ScienceDirect search interface. At the top, a green navigation bar contains links: Home + Recent Actions | Browse | **Search** | My settings | My alerts. Below this, a search bar has two rows of input fields. The first row has 'Articles' selected, 'All fields' in the first field, 'Author' in the second, and a 'Search ScienceDirect' button. The second row has 'Images' selected, 'Journal/Book title' in the first, 'Volume' in the second, 'Issue' in the third, and 'Page' in the fourth. A grey arrow points to the 'Search' link in the navigation bar. Below the search bar, there are tabs for 'All Sources', 'Journals', 'Books', 'Reference Works', and 'Images'. To the right of these tabs are links for 'Advanced search' and 'Expert search'. A 'Search tips' link with a question mark icon is also present. The main search area contains a 'Search' section with two input fields: the first contains '"Complex Regional Pain Syndrome"' and the second contains 'Albaza'. Between them is an 'in' label and a dropdown menu currently showing 'Title'. The dropdown menu is open, showing a list of search options: 'All Fields', 'Abstract, Title, Keywords', 'Authors', 'Specific Author', 'Source Title', 'Title', 'Keywords', 'Abstract', 'References', 'ISSN', 'ISBN', 'Affiliation', and 'Full Text'. A grey arrow points to the 'Full Text' option. Below the search fields, there is an 'Include' section with two checked checkboxes: 'Journals' and 'All Books'. A grey arrow points to the 'Journals' checkbox. Below this is a 'Source' section with a dropdown menu showing 'All sources'. At the bottom, there is a 'Subject' section with a list of subjects: '- All Sciences -', 'Agricultural and Biological Sciences', 'Arts and Humanities', and 'Biochemistry, Genetics and Molecular Biology'. A grey arrow points to the 'Biochemistry, Genetics and Molecular Biology' subject. To the right of the subject list, there is a note: 'Hold down the Ctrl key (or Apple key) to select multiple entries.'

Platform advantage: Supplementary files

The screenshot shows a ScienceDirect article page. The top navigation bar includes links for Home + Recent Actions, Browse, Search, My settings, and My alerts. Below this, there are search filters for Articles, Images, All fields, Author, Volume, Issue, Page, and a Search ScienceDirect button. The main content area displays the article text, which includes a paragraph about the extended mid-water layer in December, followed by an Acknowledgements section and a Supplementary Files section. The Supplementary Files section features a download icon and a link to 'Download this File (24458 K)'. A large grey arrow points from the 'Download this File' link to a Windows Media Player window. The Media Player window is displaying a 3D animation of a scientific instrument, likely a water sampling device, with a blue background. The Media Player interface includes standard playback controls and a progress bar.

The extended mid-water layer in December was observed two weeks after summer months and reached deep layers as far as 30 miles offshore.

In situ imaging instruments such as the UVP presented here are particularly useful for studying and fragile aggregates and organisms in the water column. They can be used with different probes, the user can expect a coherent and detailed description of the data processing of biological and physical variables show a great potential.
